

STEM Innovators Initiative

Future Horizons Youth Foundation | Curriculum & Laboratory Overview

Curriculum Focus

STEM Innovators delivers hands-on technical instruction designed to bridge the digital divide. Classes run after school and during summer bootcamps in state-of-the-art community lab spaces.

Key Modules

- **Python & Data Fundamentals:** Introduction to logic, variables, and data analysis.
- **Robotics Engineering:** Building and programming autonomous micro-controllers.
- **Applied Environmental Science:** Field testing soil and water quality in local parks.
- **Web Development:** HTML/CSS/JS fundamentals for community service websites.

Equipment & Resources

Participating students receive dedicated access to laptop workstations, 3D printers, and micro-robotics kits funded through regional corporate technology grants.
